

VIJAY ASHLEY RODRIGUES

Senior Data Engineer

+919353579475 • rodriguesvijay92@gmail.com • <https://www.linkedin.com/in/vijayrodrigues>
• <https://www.vijayrodrigues.in> • Bangalore, India

Summary

Senior Data Engineer (8+ years) specializing in modernizing data platforms and enabling AI-driven analytics. Built production AI workflows using Claude Code to automate complex investigations (50% faster), led multi-region pipeline optimization (35% cost reduction), and architected semantic layers for self-service analytics. Databricks Certified, proficient in Databricks, Snowflake, dbt, and Delta Lake.

Skills

Programming & Query Languages: Python • SQL • PySpark • Spark SQL

Data Engineering & Processing:

Apache Spark • Delta Lake • dbt • ETL/ELT • Data Pipelines • Data Transformation • Data Integration

Cloud & Data Platforms:

Azure Databricks • Azure Data Lake Storage (ADLS) • Azure Synapse Analytics • Azure Data Factory (ADF) • Snowflake • Unity Catalog • Hive Metastore

Data Modeling, Governance & Quality:

Data Modeling • Dimensional Modeling • Data Quality • Data Migration • dbt Testing • Data Validation & Reconciliation Frameworks • Data Governance • Access Control

Orchestration, DevOps & Collaboration: Databricks Jobs & Workflows • Apache Airflow • Git • GitHub • JIRA • Agile/Scrum

Performance Optimization: Spark Performance Tuning • SQL Optimization • Medallion Architecture

AI, LLM & Analytics:

Snowflake Cortex Analyst • LLM Analytics • Prompt Engineering • Natural Language-to-SQL • Semantic Modeling • AI-Assisted Development (Claude Code)

BI & Analytics Platforms: Qlik Sense • Streamlit

Experience

Chubb

Bangalore, India

Senior Data Engineer (Level II)

12/2021 - Present

- Established a dbt framework for Business360, migrating 45+ notebook-based transformations into 65+ dbt models. Defined standardized transformation patterns and best practices adopted by more than 3 teams within the NA region, improving code maintainability, reducing development time by approximately 40%, and establishing a repeatable template for future model development.
- Developed a reusable PySpark reconciliation framework validating over 240 million records across more than 7 external data providers. Surfaced logic discrepancies in legacy Databricks notebooks during dbt migration, enabling safe transformation and refactoring of brittle 6+ year old hardcoded workflows.
- Implemented a rule-driven AI workflow using Claude Code and custom instructions to automate PAS (Property Account Scoring) investigations, surfacing scores and flagging missing data to support underwriter decision-making. Eliminated 4 manual steps, reducing investigation time from approximately 20–25 minutes to less than 10 minutes per policy.
- Architected and modernized multi-region ETL pipelines for the API Monitoring Dashboard platform across APAC, EU, and North America. Optimized through PySpark workflow tuning and Delta Lake storage techniques (OPTIMIZE, ZORDER, VACUUM, column pruning), reducing end-to-end execution time from 10–12 hours to approximately 4 hours and lowering compute costs by approximately 35%.
- Led Business360's migration to Unity Catalog, transitioning over 300 tables from Hive Metastore, securing exposed tables with fine-grained access controls, and enabling downstream teams to access data safely ahead of platform decommissioning.
- Developed Business360 semantic models for Snowflake Cortex Analyst with over 20 verified queries, enabling non-technical stakeholders to independently query data via natural language. Adoption spread across teams as senior leaders shared access, reducing reliance on SQL analysts for analytics requests.

Experience

Proziod Analytics Pvt Ltd

Bangalore, India

Data Engineer

08/2020 - 12/2021

- Automated Python-based Excel template generation for utility auction analysis, reducing data preparation time by ~2 hours per cycle.
- Established data validation and quality checks for utility auction proposals and retailer responses, reducing rechecking time by ~1 hour per cycle.

TEKsystems (2019–2020) — Early career experience.

Technical Recruiter

CERTIFICATIONS

Databricks Certified Data Engineer Associate — Databricks

Education

Deakin University

Master of Data Science (2025-2026)

Texas McCombs School of Business

Post Graduate Program in Artificial Intelligence and Machine Learning (2024–2025)

SDM College of Business Management

Master of Business Administration - Marketing & HR (2016–2018)

St. Aloysius College

Bachelor of Computer Applications (2013–2016)
